

What's New at COMTEK

ANNOUNCING

Fall 2016

**COMTEK /400
NEW VERSION
NOW AVAILABLE**

COMTEK /400 v6.0 is now available for download from the website. This remote monitoring software from COMTEK is now in its 6th major release and has new features and expanded monitoring capacities not available in previous versions. COMTEK /400 also called NMServer, has been in continuous use worldwide since 1998. Try it FREE for 30 days.

May 2016

**New Test
Facility**

COMTEK's development lab has moved to a new location, and now includes another Stratus V-Series machine in addition to our IBM iSeries and Windows Servers. This new lab is designed to provide enhanced training and product test capabilities. We are looking forward to using the new capabilities to add functionality to COMTEK products and services.

Winter 2015

**COMTEK /VOS
New Quick Installer
& Updated
Documentation**

The New updated release of COMTEK /VOS has all of the functionality of your current version, plus a new QUICK install option. The program files now come in 'bundled' (4096) format for easier set-up and configuration. Available for STREAMS TCP on both Continuum and V-Series servers.

Fall 2014

**COMTEK /400
V4.2 with
Enhanced Features**

COMTEK /400 v4.2 for IBM i mid-range servers has an exciting new feature for monitoring the workload of up to 100 specific JobQ's on your iSeries servers. Completely customer configurable; just set a job threshold and identify the JobQ and let COMTEK do the rest. COMTEK /400 version 4.2 has all of the functionality of your current version, including the QUICK install option and enhanced ADMIN application for easier set-up and configuration.

AUG 2014

**NEW JobQ
MONITORING**

New JobQ Monitoring feature added to COMTEK /400 for iSeries/ IBMi servers. This new module allows the user to assign a job threshold for up to 100 specific Job queues and if the threshold is exceeded, COMTEK will send an Alert (snmp trap) to your NMS immediately allowing you to take action before server performance is impacted.

JUNE 2014

**NEW MSP
FEATURES**

Many organizations are selecting Managed Service Providers (MSP) to provide some or all of their IT services. MSPs have been using COMTEK products for some time.

Managed Service Providers are the focus of many of COMTEKs new Product and Support activities, including:

- We have opened a new development lab and installed a new server for testing purposes. MSP demonstrations and training are available as needed.

- New features are being added to the iSeries / IBMi and VOS products to provide enhanced functions and ease of implementation.
- MSP specific business programs and support arrangements will be available beginning in Q3, 2014

JAN 2014

**NEW
OFFICE
EXPANSION**

COMTEK is excited to announce our new facility. We have opened a second location in Nashua, NH. This new space will allow us to expand our partner development projects and provide us a new space with which to conduct demonstrations and partner training.

OCT 2013

**Q4 SALES
PROMOTION**

The COMTEK 2013 Q4 promotion has begun. We are excited to announce that through the end of this calendar year we will be offering an additional discount on all of our Remote Monitoring Software Solutions. Monitoring your IBM i/ Stratus VOS/ OpenVMS Servers can increase productivity, reduce downtime, and save your company thousands of dollars. Request your quote today at www.comtekservices.com

COMTEK /400 v4.1 comes with a new **ADMIN** application, everything you need to start using COMTEK can now be accessed quickly and easily by using the ADMIN main menu.

SEPT 2013
**COMTEK /400
NEW ADMIN
APPLICATION**

July 2013

**FireScope Inc
now selling
COMTEK Products**

FireScope Inc. recently signed an agreement with COMTEK Services which allows FireScope to sell and install COMTEK products worldwide. FireScope Inc. of Huntington Beach, CA completed the successful installation of COMTEK /400 in conjunction with FireScope Stratus and FireScope Unify at a major food producer in California in August, 2013.

FireScope Inc. is the leader in aligning customers' technology performance to their business and customer experiences through highly innovative, on-demand solutions.

May 2013

**COMTEK /VMS v4.2
First Shipment**

COMTEK /VMS v4.2, released in May 2013, has new features, improved monitoring capabilities and updated documentation. In addition, v4.2 has the capability to monitor for OpenVMS Class 32 errors. COMTEK is being used in both native and emulated OpenVMS environments. COMTEK /VMS is not proprietary – it will work with any standard SNMP manager. COMTEK /VMS is easy to install and has very little impact on the performance of the OpenVMS server.
